Completely Integrated Dual Display Touch Screen Kiosk System

The AD|VantagePoint is a dramatic dual display kiosk that features a 32", 42" or 46" high-definition digital signage display coupled with an elegant, small footprint freestanding touch screen computer system. Ideal for high traffic installations such as retail stores, entertainment venues and airports, the AD|VantagePoint offers big visibility and big power with a small footprint and sleek profile.

The AD|VantagePoint is a compact, durable and stylish interactive kiosk that provides unsurpassed reliability and flexibility. With its wide format, ultra bright HDTV LCD monitor, the AD|VantagePoint attracts and influences users while simultaneously providing an access point for your interactive self-service applications. The eye-catching, exciting dual display format provides multiples ways for you to extend and enhance your message using HD video, advertising and promotions as well as touch screen technology that facilitates user-driven interactivity.

With just one computer, the podium, which features a 22 Inch Widescreen (16:10) LCD with touch screen, and the digital signage can display the same, different or interdependent content. For instance, you can use the podium as a control panel for the user to select a how-to video, movie trailer or music video to play on the connected big screen, or run ads independent of the interactive touch screen.

The wide screen monitor features a 178 degree viewing angle, one of the widest in the industry, and special technology that allows for distortion free viewing from almost any position. The podium and digital signage are tightly integrated without exposed wires, cables or ports. With its durable, compact and vandal resistant design, the AD|VantagePoint can be installed almost anywhere.

The freestanding podium is a touch screen kiosk system with a fully integrated processing unit and power management. It is constructed from vandal resistant steel and may be ordered in stainless steel or powder coated in an array of colors to give the podium a unique or brand-reinforcing appearance or to compliment the décor of the installation site. A host of peripheral devices may be fully and securely integrated into the podium.
