In Table Kiosk

Questions? Call 888.587.1777

Completely Integrated Counter Top Touch Screen Kiosk System

The In Table Kiosk mounts directly to counter and table-tops. Ideal for installations that require a fixed solution with a small footprint.

The In Table integrates seamlessly to surfaces that are between one-half and two inches thick. By fastening the kiosk to a countertop or surface, the kiosk terminal is a fixture of the install, creating a secure and stable installation site. The system also may be mounted at any angle, providing installation flexibility.

This kiosk is perfectly suited to display self-service applications, motion picture quality video, text and graphics in almost any environment. With a variety of screen size options, the In Table kiosk includes a computer in an injection molded plastic or metal housing, which is just over four inches deep.

The In Table uses only industrial grade components, ensuring maximum uptime and minimizing the need for costly maintenance. The durable construction of the terminal resists tampering, making it excellent for unattended applications. The housing is securely mounted to the installation surface with tubes made from cold-rolled steel.

Easy but protected access to the terminal's input and output connections, including ports, power switch and network jack, makes set up and maintenance of the system effortless. With its compact and sturdy design, the In Table is an ideal choice for high-traffic installations sites where space is at a premium and durability is a must.

Shown with 19" stainless steel upgrade

SPECIFICATIONS

LCD DISPLAY OPTIONS::

- 24" LED Widescreen LCD Panel (1920x1200) (Steel Bezel)
- 22" LED Widescreen LCD Panel (1680x1050) (Steel Bezel)
- 19" Active Matrix 360 NIT LCD Panel (1280 x 1024) (Steel Bezel)
- 15" Active Matrix 360 NIT LCD Panel (1024 x 768)
