VantagePoint

Free Standing Touch Screen Kiosk System

The VantagePoint Is Thin. The VantagePoint kiosk, which is less than 17.5 inches deep, is a sleek and elegant yet durable touch screen system ideal for self service applications. The VantagePoint offers all the functionality and features of a traditional cabinet kiosk with a revolutionary slim profile. The VantagePoint also provides the stature, signage opportunities and visibility of a conventional kiosk in a fraction of the space.

The VantagePoint Is Good Looking. The VantagePoint stand is constructed from vandal resistant steel and may be manufactured in any color to give the kiosk a unique or brand reinforcing appearance or to compliment the décor of the installation site. Additionally, an acrylic overlay may be mounted to the kiosk front and a secondary LCD or replaceable billboard may be attached to the top of the system so signage can be prominently displayed on the kiosk. The entire system can be manufactured in stainless steel for a designer look with increased corrosion protection.

The VantagePoint Knows How Accessorize. A host of peripheral devices may also be fully and securely integrated into the VantagePoint kiosk. Optional devices for the VantagePoint include bar code scanners, stereo speakers, magnetic swipe readers, tamper and moisture resistant keyboards, digital video cameras, badge readers and scanners. The system can support receipt, ticket and full size printers.

The VantagePoint Is Ready to Perform. Powered by a Dell small form factor computer with 3 year on-site program, the VantagePoint provides robust and responsive multimedia computing for a dynamic interactive experience as well as high uptime and availability of your critical kiosk applications. With fast processing power, full-screen video and high quality sound, the VantagePoint is ideal for user-driven, self service applications. The VantagePoint uses a standard, open architecture designed to run your software and applications that are off-the-shelf, from SeePoint, independent software vendors or your in-house team.

The VantagePoint is a reliable, cost effective solution ideal for easy, rapid and wide spread installation. To create an instantaneous self service solution, just remove the kiosk system from its box and plug it in. Unlike many products, the VantagePoint is a fully integrated kiosk system that does not require any on-site assembly, cabling or wiring.
