Free Standing Touch Screen Kiosk System

The VantagePoint Light Is Thin. The VantagePoint Light kiosk, which is less than 17.5 inches deep, is a sleek and elegant yet durable kiosk system ideal for self service applications. The VantagePoint Light offers all the functionality and features of a traditional cabinet kiosk with a revolutionary slim profile. This free standing kiosk also provides the stature, signage opportunities and visibility of a conventional kiosk in a fraction of the space.

The VantagePoint Light Is Good Looking. The VantagePoint Light stand is constructed from vandal resistant steel and may be manufactured in any color to give the kiosk a unique or brand reinforcing appearance or to compliment the décor of the installation site. Additionally, acrylic overlays may be mounted to the kiosk front and a replaceable billboard may be attached to the top of the system so signage may be prominently displayed on the kiosk.

The VantagePoint Knows How Accessorize. A host of peripheral devices may also be fully and securely integrated into the VantagePoint Light kiosk. Optional devices for the VantagePoint Light include bar code scanners, stereo speakers, magnetic swipe readers, tamper and moisture resistant keyboards, digital cameras, badge readers and scanners.

The VantagePoint Is Ready to Perform. The VantagePoint Light provides robust and responsive multimedia computing for a dynamic interactive experience as well as high uptime and availability of your critical kiosk applications. With fast processing power, full-screen video and high quality sound, the VantagePoint Light is ideal for user-driven, self service applications. The VantagePoint Light runs Windows compatible software and applications that are off-the-shelf, from independent software vendors or your in-house team.

The VantagePoint Light is a reliable, cost effective solution ideal for easy, rapid and wide spread installation. To create an instantaneous self service solution, just remove the kiosk system from its box, plug it in and load your website or custom application. Unlike many products, the VantagePoint Light is a fully integrated kiosk system that does not require any on-site assembly, cabling or wiring.

Shown with keyboard and 1/2 size overhead signage
